The right size of a bike is crucial for a good ride. If you do not know your size, we'll give you some tipps, how to calculate the right frame size for your rental bike.

1. Measure your inseam length in cm.
2a. Multiply the result by 0,574 (for mountainbikes) or
2b. Multiply the result by 0,665 (for roadbikes).
3. If the calculated result is between two sizes, choose the larger size for riding more convenient or the smaller size for a more sportive ride.
